KEY

Planting

- Existing Tree to be retained
- Proposed trees
Proposed species to comprise a mix of native (to increase biodiversity value) and non-native species (to increase biodiversity value and provide habitat). The proposed species will not comprise more than 10% of a single species.
- Proposed Orchard Trees
Proposed species to include heritage species of fruit trees. These species will contribute to biodiversity and heritage conservation. The proposed trees will also provide outdoor learning opportunities.
- Hedge Planting
Proposed hedges and hedgerows across the site have two main objectives:
- Screening, evergreen species will be proposed to support privacy to sensitive playground areas, species proposed will be native species and thorns will be specified.
- Supporting biodiversity, native species will be included. These will need to be in areas where students will not have access, as native species include berries and thorns.
- Amenity Planting and Rain Gardens
Rich shrub and perennial planting with seasonal change interest, sensory.
Species to be low toxic, with no berries and without thorns.
- Grass Seed
Low maintenance mix, with uniform seed head growth for low cutting regimes.
Amenity grass areas with low accessibility areas will be planted with tufts to increase biodiversity.
- Meadow high species grass
Located in areas with restricted access, species to include native species.
- Woodland Planting
Woodland planting located to screen playground, native species to be included.
